Percentage Share And Monthly Report Generation As Per Criteria For Commission.

Manage Everything In The Stocks From Manufacturing Date To Stock Limits.

User Rights And Restriction Along With Activity Log Reporting.

Benefits Of Life And Hospital Management Software (LHMS)

Digital Medical Records

The hospital database holds all the important patient data. Doctors without much delay to make an exact diagnosis and guide the patient's health can obtain the disease history, test issues, prescribed treatment. It allows for lower risks of mistakes.

Department Management

Hospitals specialists are capable to manage their possible resources, examine department staff work, overcome equipment downtime, optimize the supply series, etc. Another factor to consider is that the hospital department deals with digital data instead of countless paperwork.

Better Data Security

The point has been highlighted and strengthened by experts that hospitals that rely on the manual system are more exposed to data theft and leakage than automated ones. A full-fledged Life And Hospital Management Software (LHMS) holds each bit of data secure from unauthorized access.

Benefits Of Life And Hospital Management Software (LHMS)

Improved Efficiency

Using software enables the processes automated to mean that the processes will be taken care of mechanically without any human intervention and this will instantly ensure improved efficiency.

Reduces Scope of Error

Because processes on Life And Hospital Management Software (LHMS) are automated and a lot of tasks are assigned to the software to perform with utmost accuracy with minimum human intervention, the scope of error is reduced dramatically.

DYNODE SOFTWARE

Benefits Of Life And Hospital Management Software (LHMS)

Avoid Mistakes & Track Each Detail

Managing hospital is a significant concern where there is no scope for mistakes. A manual system can't ensure reliable and 100% accurate processing. There are chances of errors and mistakes. Installing an automated management system removes the risk of error entirely, and you avoid compliance issues, the two most significant hassles for medical centers and hospitals.

Benefits Of Life And Hospital Management Software (LHMS)

Patient Scheduling

It provides medical providers to simply schedule patients, register them, and option to choose a reason for their visit.

Patient History

It saves information about existing problems, diseases, medications, etc.

Data Management

This element allows medical practitioners to attach and store patient information electronically and enables physicians to inspect it.

Efficiency in billing

All in one integrated system for inpatient and outpatient billing.

Benefits Of Life And Hospital Management Software (LHMS)

Mobile No: +91-7979078552

Effective Marketing

SMS integration to Improve communication with patients, staff, doctors, suppliers & other ecosystem partners.

Management Time Saving

Free yourself from administrative and operational aspects to focus on personal, academic, medical, or strategic matters to grow your hospital.

Laboratory Efficiency

Integrate with the Auto analyzer. Pinpoint where the reagents are being used.
